NOTE:

- BAKE/TIME BAKE Bake and broil units cycle during preheat and balance of operation, one unit is on at a time
- CLEAN Broil unit only on during 1st 30 minutes or until oven reaches 750°F. During balance of clean oven will cycle between bake and broil units.

Cooktop Lockout Operation:

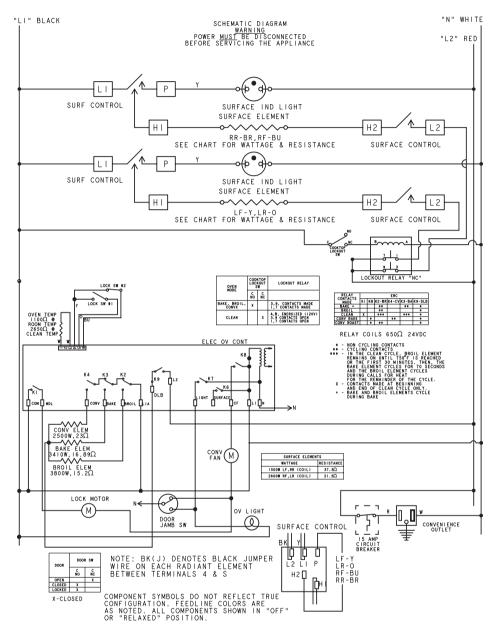

When the self-clean cycle is started, locking the door closes the cooktop lockout switch. This energizes the cooktop lockout relay located on the back of the range. The relay contacts will open and disable the surface elements. The surface elements will remain inoperable until the self-clean operation is complete.
